Platform: Salesforce Developer Edition

Technologies: Flow Builder · Agentforce · Prompt Builder · Reports & Dashboards

AI-Enabled Student Admission System

User Story:

As an **Admission Counselor** at an educational institution, I want to efficiently manage student admissions and support activities using the AI-Enabled Student Admission & Support Management System. I want to easily create, update, and track student enrollment records, manage course information, and monitor the status of each admission application through a centralized platform. The system should automate key admission processes such as validation rules, approval workflows, email notifications, and record updates to improve accuracy, reduce manual effort, and speed up the admission process. Additionally, I require AI-powered insights through **Agentforce** to prioritize student applications, identify potential risks, and receive intelligent recommendations that support faster and more informed admission decisions. The system should also provide reports for tracking admission status and enrollment details, enabling administrators and counselors to make better operational decisions and improve the overall student admission experience.

1. INTRODUCTION

1.1 Project Overview :

The project "AI-Enabled Student Admission & Support Management System" focuses on developing a Salesforce-based application to streamline and automate the student admission process for educational institutions. The system enables efficient management of student enrollment, course information, admission approvals, and user access while automating key business processes through validation rules, approval workflows, email notifications, flows, and Agentforce AI. The project user story and objectives are defined in the initial section of the document.

1.2 Purpose :

The purpose of this project is to:

- Streamline and automate the student admission process.
- Centralize the management of student, course, and enrollment information.
- Improve data accuracy through validation rules and automated workflows.
- Enhance admission decision-making using Agentforce AI insights and recommendations.
- Automate approval processes, email notifications, and admission-related tasks.
- Ensure secure access to admission data through user roles, profiles, and role hierarchy.
- Improve operational efficiency and provide better support for admission counselors and administrators.

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Templat

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Admission Counselor	Manage student applications and enrollment records efficiently	The admission process is slow and time- consuming	Student information is managed manually and across multiple records	Stressed and less productive
PS-2	Admission Manager	Review and approve student admissions quickly	Approval decisions are delayed and difficult to track	There is no automated approval workflow or AI-based prioritization	Frustrated and inefficient
PS-3	Student	Receive timely updates about my admission status	I do not receive instant notifications or clear admission updates	The admission process lacks automated communicati on and status tracking	Anxious and uncertain

Problem Statements – AI-Enabled Student Admission & Support Management System

PS	I am (User)	I'm trying to	But	Because	Which makes me feel
PS-1	 Admission Counselor	Manage student applications and enrollment records efficiently 	The admission process is slow and prone to errors 	Student data is handled manually and across multiple records 	Stressed and less productive 
PS-2	 Admission Manager	Review and approve student admissions quickly 	Approval decisions are delayed 	There is no automated approval workflow or AI-assisted prioritization 	Frustrated and inefficient 
PS-3	 Student	Receive timely updates on admission status 	I do not receive instant notifications or clear status updates 	The admission process lacks automated communication 	Anxious and uncertain 
 Our Goal To automate and simplify the admission process, provide real-time updates, and use AI insights for better decisions.  Automated Workflows  Email Alerts & Notifications  AI-Powered Insights (Agentforce)  Reports for Better Decisions  Secure Access with Roles & Profiles					

2.2 Empathy Map Canvas

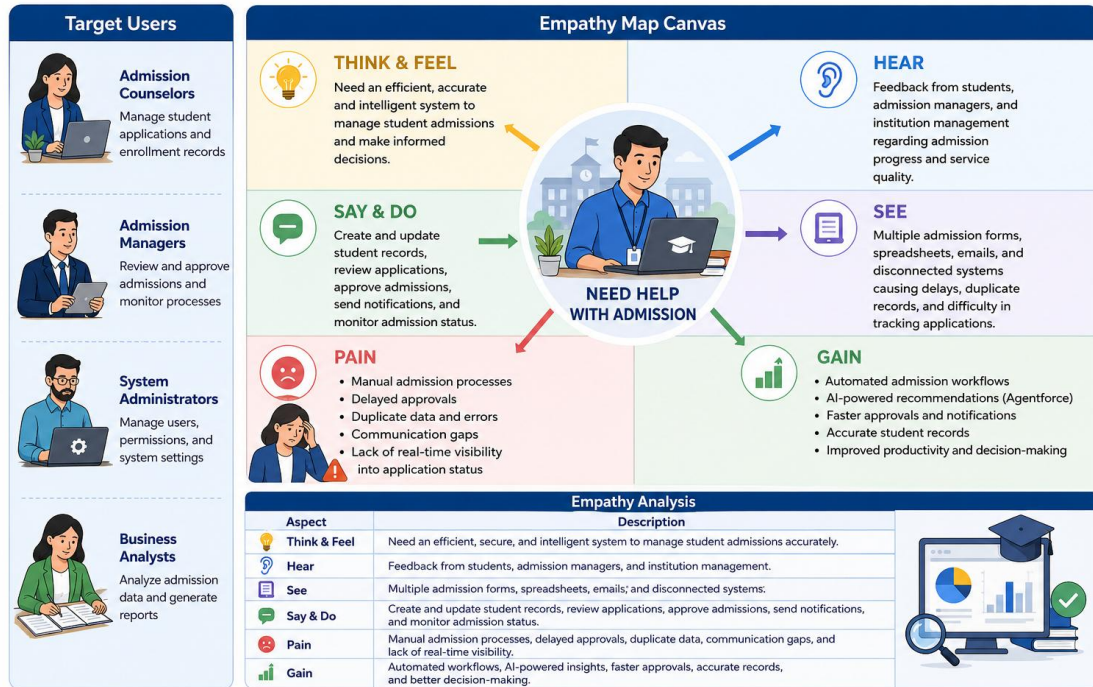

Target Users

- Admission Counselors
- Admission Managers
- System Administrators
- Students

Empathy Analysis

Aspect	Description
Think & Feel	Wants a fast, accurate, and AI-powered admission management system.
Hear	Receives feedback and admission updates from students and management.
See	Sees manual admission processes, paperwork, and scattered student records.
Say & Do	Manages student applications, approvals, and enrollment records efficiently.
Pain	Faces delayed approvals, manual work, and data duplication.
Gain	Achieves automated admissions, faster approvals, and improved decision-making through AI.

Empathy Map Canvas – AI-Enabled Student Admission & Support Management System

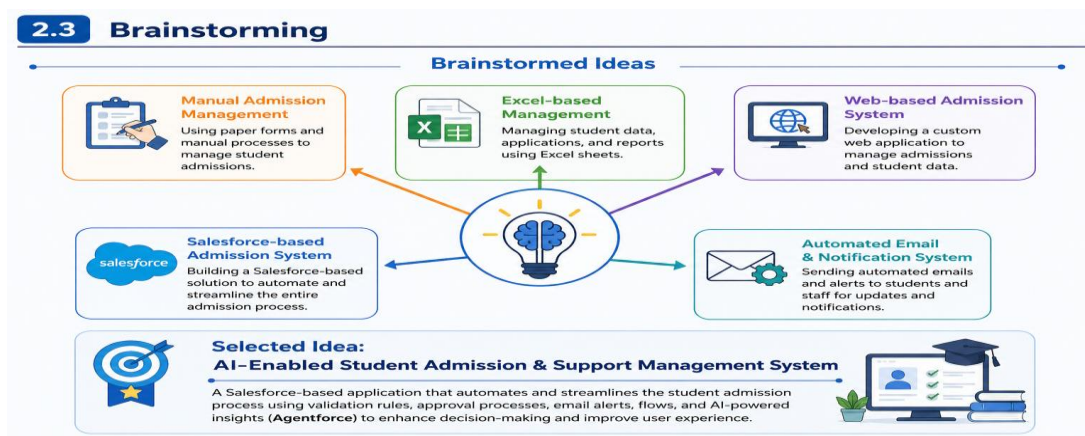

2.3 Brainstorming

Brainstormed Ideas

- Manual CRM system
- Excel-based management
- Web-based CRM
- Salesforce-based CRM
- Automated email system

Selected Idea:

Salesforce-based CRM Application for AI-Enabled Student Admission & Support Management System

3. REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Journey Stages:

- Custom Objects
- Validation Rules
- Approval Process
- Email Alerts
- Flows
- Agentforce AI
- Users, Roles & Profiles

3.1 Customer Journey Map – AI-Enabled Student Admission & Support Management System

A seamless end-to-end admission journey powered by Salesforce, automation, and AI (Agentforce).

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	Secure user login with role-based access control.
FR-2	Create and manage student, course, and enrollment records.
FR-3	Capture and update student admission information.
FR-4	Validate admission data using Salesforce validation rules.
FR-5	Automate admission approvals through approval processes.
FR-6	Send automated email notifications and alerts to users.

Non-Functional Requirements

NFR-1: Usability

The system should be easy to use for Admission Counselors, Admission Managers, and System Administrators without requiring extensive technical training.

Requirements :

- Simple and intuitive user interface
- Easy navigation through Lightning App
- User-friendly forms and page layouts
- Clear labels and instructions

Example:

A new Admission Counselor should be able to log in, create a student record, and submit an admission application within a few minutes. Salesforce Lightning Experience provides an intuitive interface for easy navigation.

NFR-2: Security

The system must protect student and institutional data from unauthorized access.

Requirements:

- Role-based access control
- Secure user authentication
- Field-level and object-level security
- Secure password policies

Examples:

- Profiles and Roles
- Permission Sets
- Object and Field-Level Security
- Secure Login Authentication

NFR-3: Reliability

The system should operate reliably and maintain accurate student admission data.

Requirements:

- Automatic data saving
- Regular system backups
- Error handling mechanisms
- Stable cloud environment

Example :

If an admission counselor loses internet connectivity while updating a student record, Salesforce safely stores the data and maintains data integrity through its cloud platform.

NFR-4: Performance

The system should respond quickly and efficiently while handling admission records.

Requirements:

- Fast page loading
- Quick record retrieval
- Efficient workflow execution
- Minimal response delay

Example:

Student records, approval requests, and AI recommendations should load within a few seconds for a smooth user experience.

NFR-5: Availability

The system should be accessible whenever admission activities are performed.

Requirements:

- 24/7 availability
- High system uptime
- Cloud-based access
- Disaster recovery support

Example: Admission staff should be able to access the system anytime during the admission cycle using Salesforce's cloud platform.

NFR-6: Scalability

The system should support increasing numbers of students, courses, and users without performance degradation.

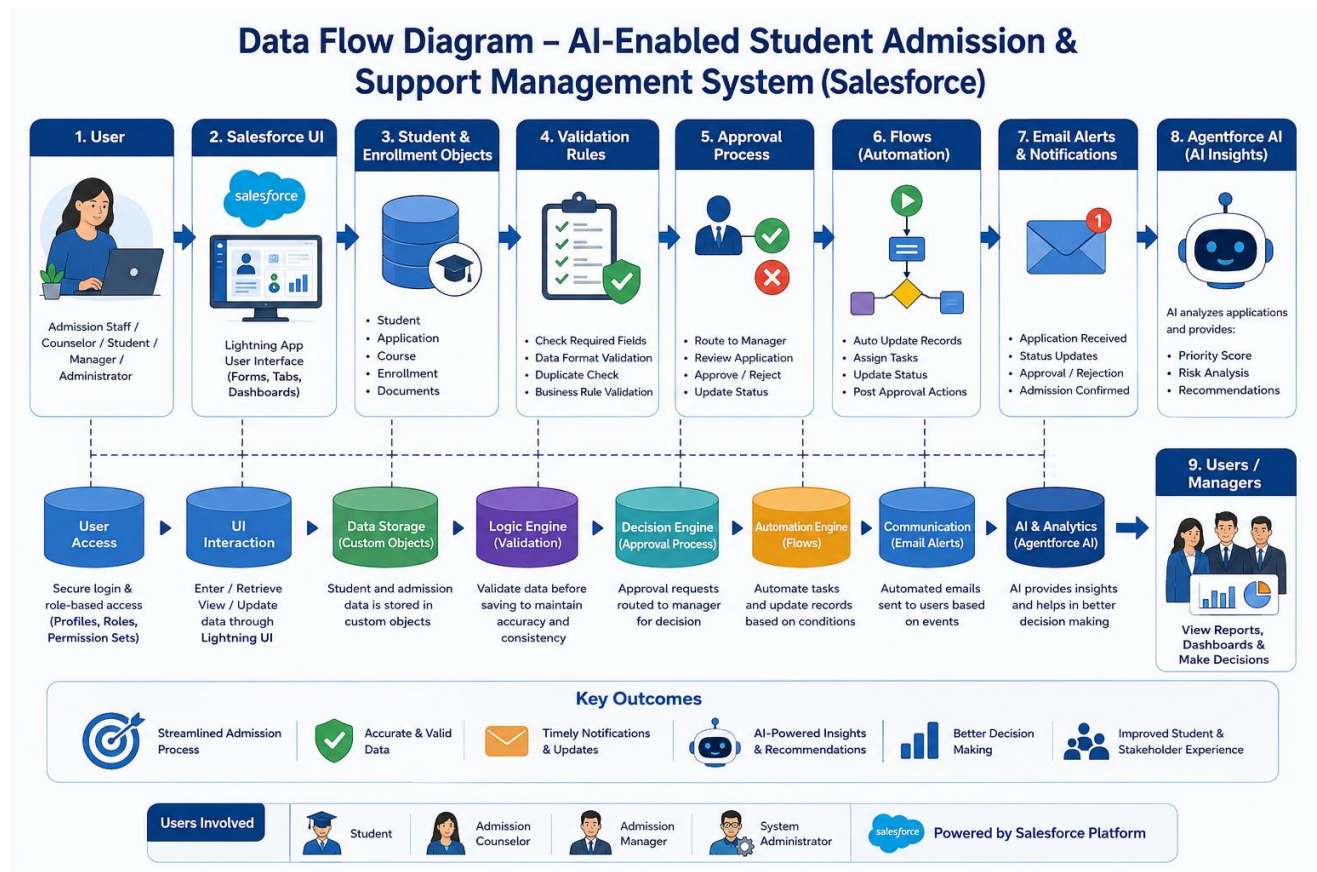

Requirements:

- Support more users
- Handle growing student records
- Expand storage capacity
- Maintain performance during peak admissions

Example: As the institution grows, the system should efficiently manage thousands of student applications without slowing down.

Data Flow Diagram

Student/Admission Staff → Salesforce Lightning App → Student & Enrollment Objects → Validation Rules → Approval Process → Email Alerts & Flows → Agentforce AI → Users/Managers

3.3 Technology Stack

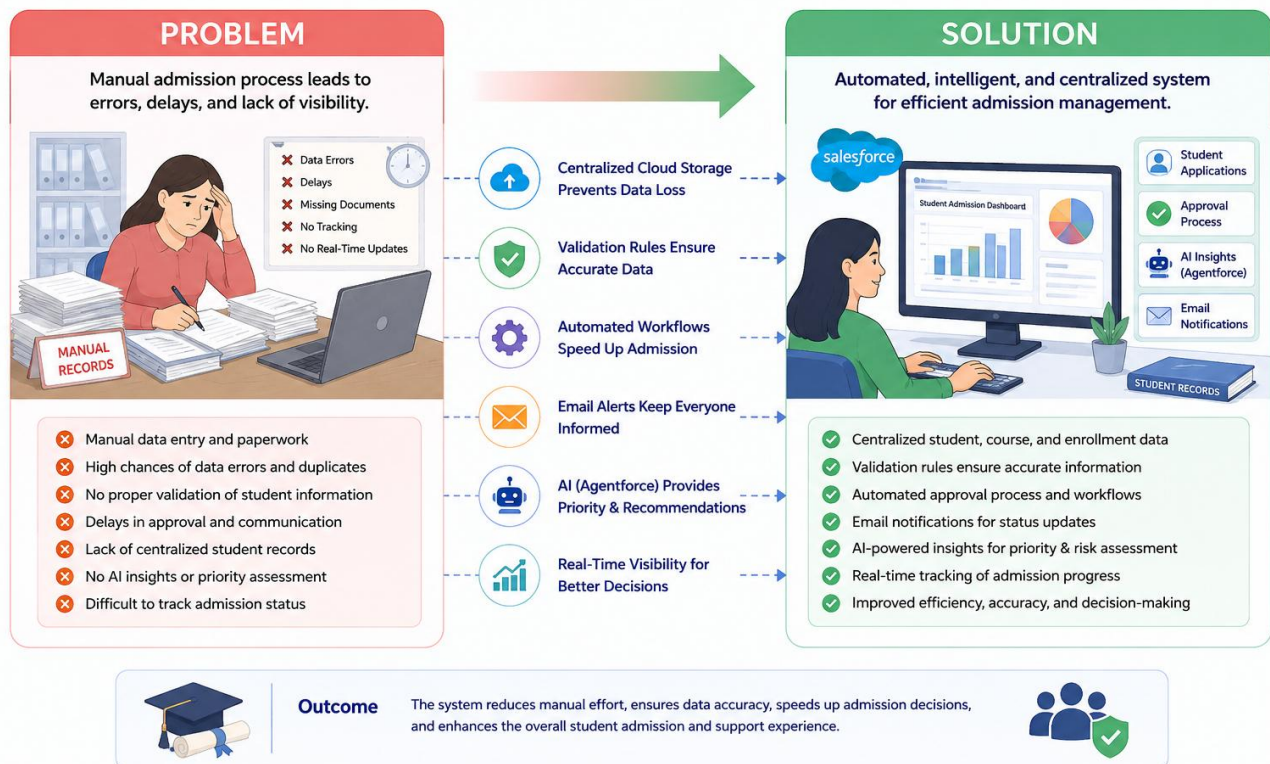

Layer	Technology
Frontend	Salesforce Lightning Experience (Lightning App, Page Layouts, Dynamic Forms)
Backend	Salesforce Platform (Declarative Development)
Database	Salesforce Cloud (Custom Objects & Standard Objects)
Automation	Salesforce Flows, Approval Process, Email Alerts & Email Templates
AI	Salesforce Agentforce AI
Security	Profiles, Roles, Permission Sets, Validation Rules
Development Tools	Salesforce Developer Edition

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The AI-Enabled Student Admission & Support Management System replaces manual admission processes with an automated Salesforce-based solution. The system centralizes student, course, and enrollment data, validates information using validation rules, automates approval workflows, sends email notifications, and provides AI-powered recommendations through Agentforce. This improves data accuracy, reduces manual effort, speeds up admission decisions, and enhances the overall admission management process.

Problem–Solution Fit – AI-Enabled Student Admission & Support Management System

1.1 Proposed Solution

Functional Requirements

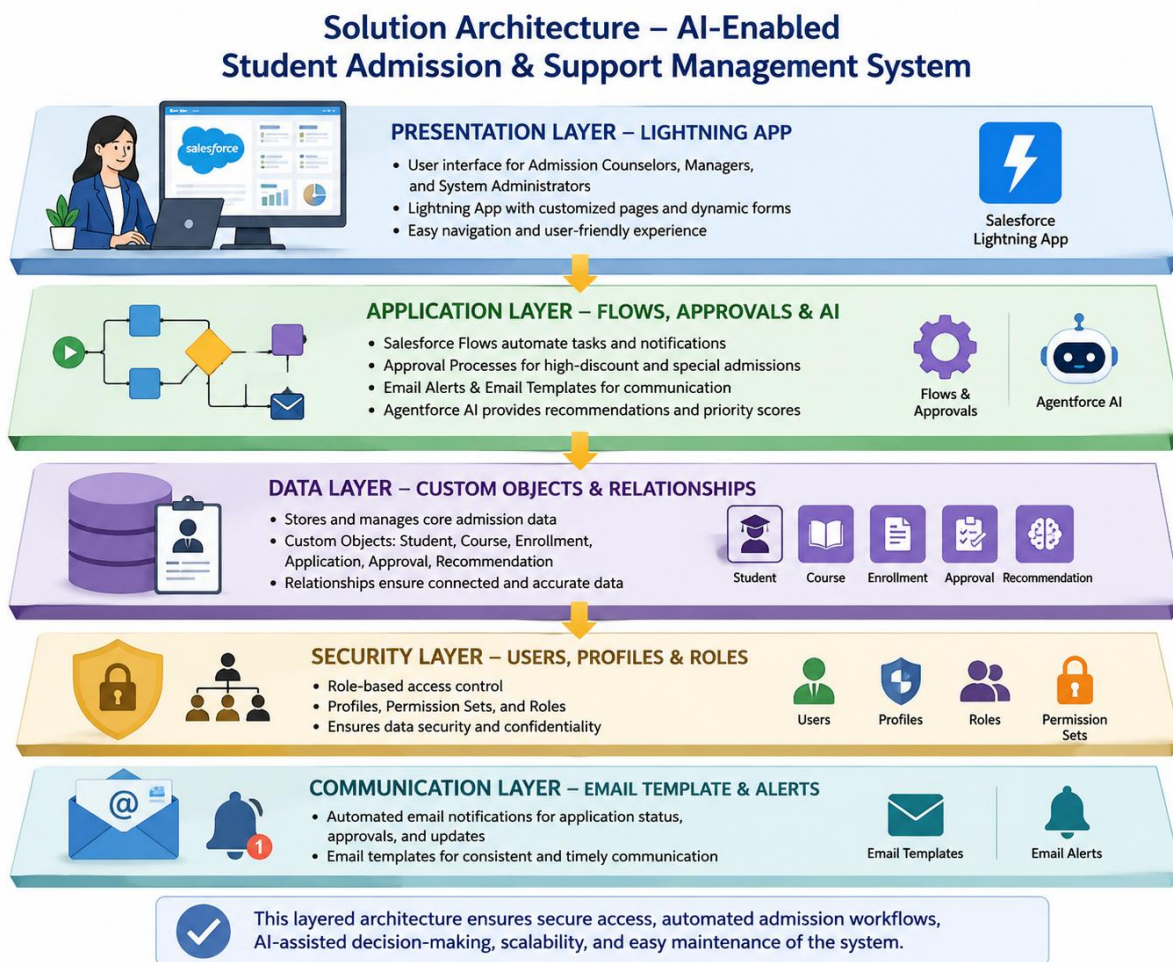

Parameter	Description
User Login & Authentication	Allows authorized users such as Admission Counselors, Admission Managers, and System Administrators to securely access the system.
Student Enrollment Management	Enables users to create, view, update, and manage student admission and enrollment records.
Course Management	Allows administrators to maintain course details, eligibility criteria, intake capacity, and fee structure.
Student Application Management	Supports the submission, tracking, and processing of student admission applications.
AI Priority Score	Automatically prioritizes student applications based on predefined AI criteria to assist admission counselors.
Approval Process	Automates approval workflows for high-discount or special admission requests through Salesforce Approval Processes.
Validation Rules	Ensures accurate and complete data entry by validating mandatory fields and business rules.
Objects & Relationships	Maintains structured relationships between Student, Course, Enrollment, and related records for efficient data management.
Email Templates & Alerts	Sends automated email notifications for application status, approvals, and important admission updates.
Flow Automation	Automates tasks such as record updates, approval routing, notifications, and reminders using Salesforce Flows.
Agentforce AI	Provides AI-powered recommendations, application prioritization, and decision support for admission teams.
Lightning App & Dynamic Forms	Offers a user-friendly interface with customized Lightning pages and dynamic forms for efficient data management.
Users, Profiles & Roles	Controls system access using Salesforce Users, Profiles, Roles, and Role Hierarchy to ensure data security.
Deployment & Monitoring	Supports deployment using Salesforce Change Sets and enables monitoring of automation, approvals, and system performance after deployment.

1.2 Solution Architecture

Architecture Layers

- Presentation Layer – Salesforce Lightning App
- Application Layer – Flows, Approval Processes & Agentforce AI
- Data Layer – Custom Objects & Relationships
- Security Layer – Users, Profiles & Roles

This layered architecture ensures secure access, automated admission workflows, AI-assisted decision-making, scalability, and easy maintenance of the Student Admission & Support Management System.

2. PROJECT PLANNING & SCHEDULING

2.1 Project Planning

- The project followed an Agile-based development approach with well-defined milestones and development phases.
- A Salesforce Developer Edition account was created to build and test the application.
- Custom Objects were designed to manage student, course, enrollment, and approval information.
- Custom Tabs and a Lightning App were developed to provide easy navigation for admission users.
- Custom Fields and Object Relationships were configured to maintain accurate and connected student admission data.
- Dynamic Forms and Lightning Record Pages were customized to improve the user experience.
- Validation Rules were implemented to ensure accurate and complete student information.
- Approval Processes were configured to automate the approval of high-discount and special admission requests.
- Email Templates, Email Alerts, and Salesforce Flows were developed to automate notifications and admission workflows.
- Agent force AI was integrated to provide intelligent recommendations and prioritize student applications.
- Users, Profiles, and Roles were configured to implement secure role-based access control.
- Regular testing and milestone reviews were conducted throughout development to ensure the application met project requirements.
- The project was completed within the planned schedule through systematic planning, implementation, testing, and deployment.

3. Project Development Phase:

Project Flow

- **Milestone 1:** Creation of Salesforce Developer Account
- **Milestone 2:** Custom Object Creation
- **Milestone 3:** Tabs Creation
- **Milestone 4:** Fields and Relationships Configuration
- **Milestone 5:** Validation Rules Implementation
- **Milestone 6:** Approval Process Configuration
- **Milestone 7:** Email Templates Creation
- **Milestone 8:** Email Alerts Configuration
- **Milestone 9:** Salesforce Flows Automation
- **Milestone 10:** Agentforce AI Integration
- **Milestone 11:** Lightning App Development
- **Milestone 12:** Dynamic Forms and Page Layout Customization
- **Milestone 13:** Users, Profiles, and Role Hierarchy Configuration
- **Milestone 14:** Deployment and System Testing
- **Milestone 15:** Project Conclusion

What you'll learn

- Real-Time Salesforce Project Development
- Salesforce Standard and Custom Objects
- Custom Fields and Object Relationships
- Validation Rules and Data Validation
- Approval Process Automation
- Email Templates and Email Alerts
- Salesforce Flows for Process Automation
- Agentforce AI Configuration and Integration
- Lightning App, Dynamic Forms, and Page Layout Customization
- User Management, Profiles, Roles, and Deployment

Implementation

Milestone 1 - Salesforce developer account creation :

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign-up form, enter the following details:

Build enterprise-quality apps fast to bring your ideas to life

- Build apps fast with drag and drop tools
- Customize your data model with clicks
- Go further with Apex code
- Integrate with anything using powerful APIs
- Stay protected with enterprise-grade security
- Customize UI with clicks or any leading-edge web framework

Sign up for your Salesforce Developer Edition
A full-featured copy of the Platform, for free

Complete the form to start your free trial. Our team will be in touch to help you make the most of your trial.

First Name* Last Name*

Email*

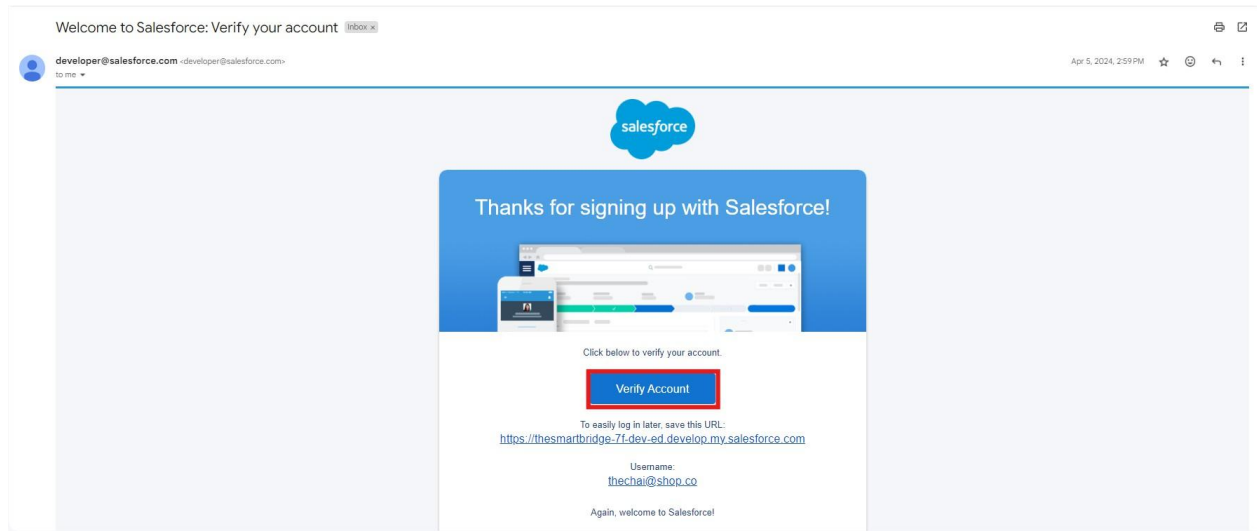

Role*

Company*

- 1) First name & Last name
 - 2) Email
 - 3) Role: Developer
 - 4) Company: College or Company Name
 - 5) Country: India
 - 6) Postal Code: pin code
 - 7) Username: should be a combination of your name and company This need not be an actual email id, you can give anything in that format: username@organization.com
- Click on sign me up after filling these.

Activity 2: Account Activation:

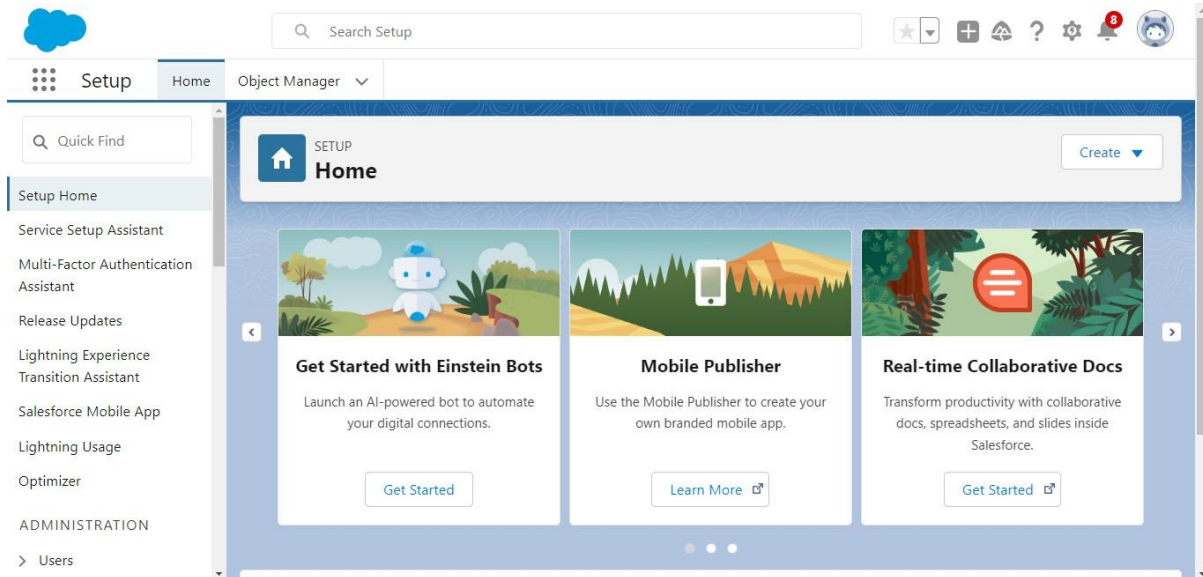

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.

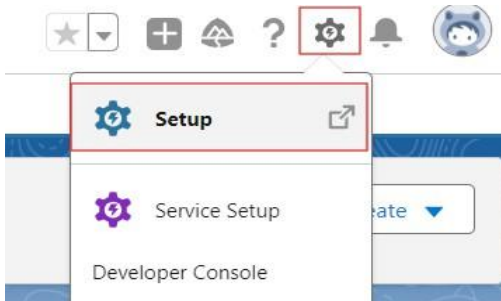

A screenshot of the "Change Your Password" page in Salesforce. The page title is "Change Your Password". It prompts the user to "Enter a new password for lead@sb.com." and lists requirements: "8 characters", "1 letter", and "1 number", all of which are marked as satisfied with green checkmarks. The form contains several fields: "New Password" (with a "Good" status), "Confirm New Password" (with a "Match" status), "Security Question" (a dropdown menu showing "In what city were you born?"), and "Answer" (containing the text "asdfghjkl"). A blue "Change Password" button is at the bottom of the form.

4. Then you will redirect your salesforce setup page.

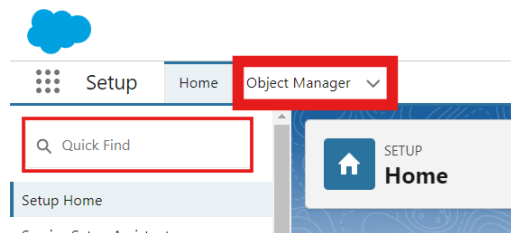

Milestone 2 - Custom Object Creation

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3. On the Object Manager page, click Create | Custom Object.

Activity 1: Employer Account Object

From **Setup** → **Object Manager** → **Create** → **Custom Object**.

1. **Label:** Student
2. **Plural Label:** Students
3. **Record Name:** Student ID (or Student Name, based on your implementation)
4. **Data Type:** Auto Number / Text
5. Under **Optional Features**, enable:
 - a. Allow Reports
 - b. Allow Activities
 - c. Track Field History
6. Under **Search Status**, check **Allow Search**.
7. Click **Save**.

Activity 2: Course Object

From **Setup** → **Object Manager** → **Create** → **Custom Object**.

- **Label:** Course
- **Plural Label:** Courses
- **Record Name:** Course Name
- **Data Type:** Text
- Under **Optional Features**, enable:
 - Allow Reports
 - Allow Activities
 - Track Field History
- Under **Search Status**, check **Allow Search**.
- Click **Save**.

Activity 3: Student Enrolment Object

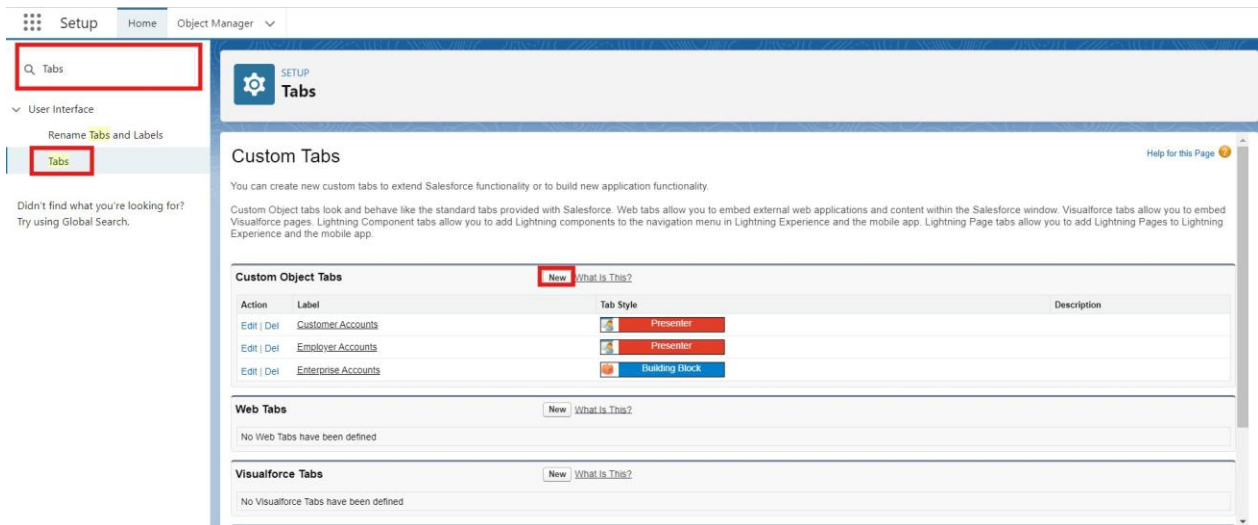

From **Setup** → **Object Manager** → **Create** → **Custom Object**.

- **Label:** Student Enrolment
- **Plural Label:** Student Enrolments
- **Record Name:** Enrolment ID (or Enrolment Name, based on your implementation)
- **Data Type:** Auto Number / Text
- Under **Optional Features**, enable:
 - Allow Reports
 - Allow Activities
 - Track Field History
- Under **Search Status**, check **Allow Search**.
- Click **Save**.

Milestone 3 - Tabs

Activity 1: Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)

2. Select Object (Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab.
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs			
New What Is This?			
Action	Label	Tab Style	Description
Edit Del	Customer Accounts	Presenter	
Edit Del	Employer Accounts	Presenter	
Edit Del	Enterprise Accounts	Building Block	

Milestone 4 - Fields & Relationships

Activity 1: Creating Custom Fields for Student Object

1. Navigate to Setup → Object Manager → Student.
2. Select Fields & Relationships.
3. Click New.
4. Choose the required field type.
5. Enter the field details.
6. Save the field.

Activity 2: Creating Custom Fields for Course Object

1. Navigate to Setup → Object Manager → Course.
2. Open Fields & Relationships.
3. Click New.
4. Create the required fields.
5. Save.

The screenshot shows the Salesforce Setup interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The left sidebar shows a list of setup options: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'SETUP > OBJECT MANAGER Opportunity'. It contains a form for creating a new field. The 'Field Label' is 'Counselor Assigned', the 'Field Name' is 'Counselor_Assigned', and the 'Child Relationship Name' is 'Opportunities'. The 'Auto add to custom report type' checkbox is checked. There is a 'Lookup Filter' section with a link to 'Tell me more!'. At the bottom, there is a 'Show Filter Settings' link.

Milestone 5 : Validation rules

Activity 1: To create a Validation rule to Course Object

1. Go to setup >> click on Object Manager >> type object name (Course) in search bar >> click on the Course object
2. Click on the validation rule >> click on New.
3. Enter the Rule name as “Course Fee Validation”.
4. Select Active
5. Insert the Error Condition Formula as:
6. $\text{Course_Fee_c} \leq 0$
6. Enter the Error Message as “Course Fee must be greater than zero”.
7. Select the Error location as Top of the page
8. Click Save.

Activity 2: To create a Validation rule to Opportunity Object

1. Validation Rule on Start Date:
2. Go to setup >> click on Object Manager >> type object name (Opportunity) in search bar >> click on the Opportunity object
3. Click on the validation rule >> click on New.
4. Enter the Rule name as “Start Date Validation”.
5. Select Active
6. Insert the Error Condition Formula as: Expected_Start_Date < TODAY()
7. Enter the Error Message as “Expected Start Date cannot be in the past.”
8. Select the Error location as Top of the page
9. Click Save.

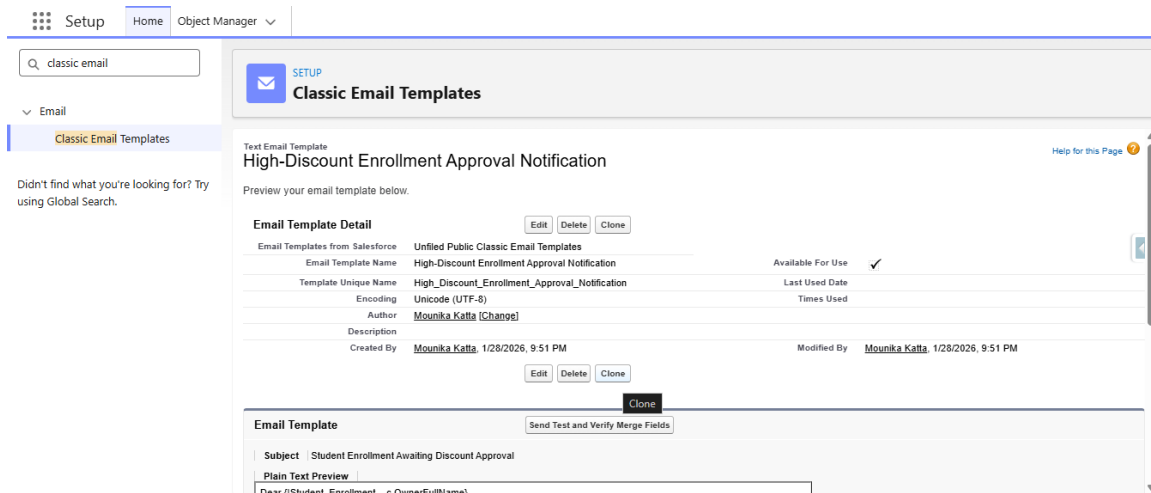

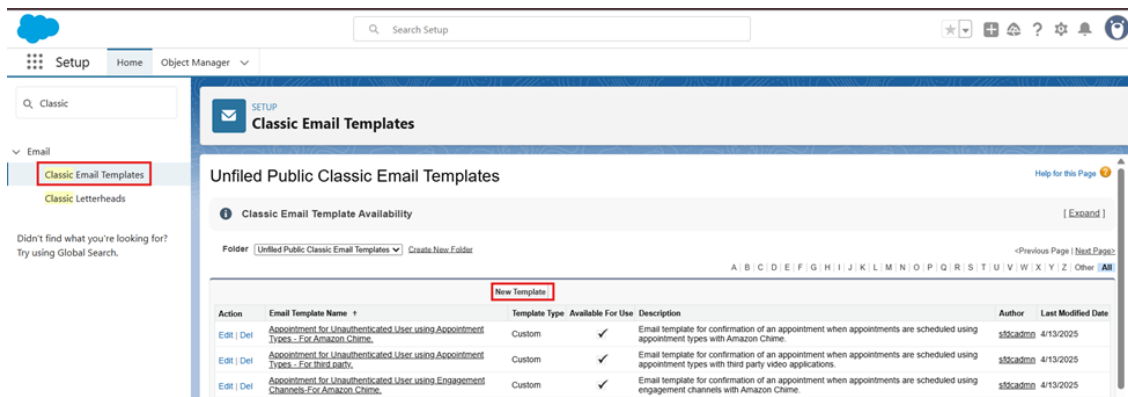

Activity 3: To create a Validation rule on Student Enrollment Object

1. Validation Rule on Discount Percentage:
2. Go to setup >> click on Object Manager >> type object name (Student Enrollment) in search bar >> click on the Student Enrollment object
3. Click on the validation rule >> click on New.
4. Enter the Rule name as “Discount Percent Validation”.
5. Select Active
6. Insert the Error Condition Formula as: Discount_Percentage__c > 50
7. Enter the Error Message as “Discount cannot be greater than 50%”.
8. Select the Error location as Top of the page
9. Click Save.

Milestone 6 : Approval Process

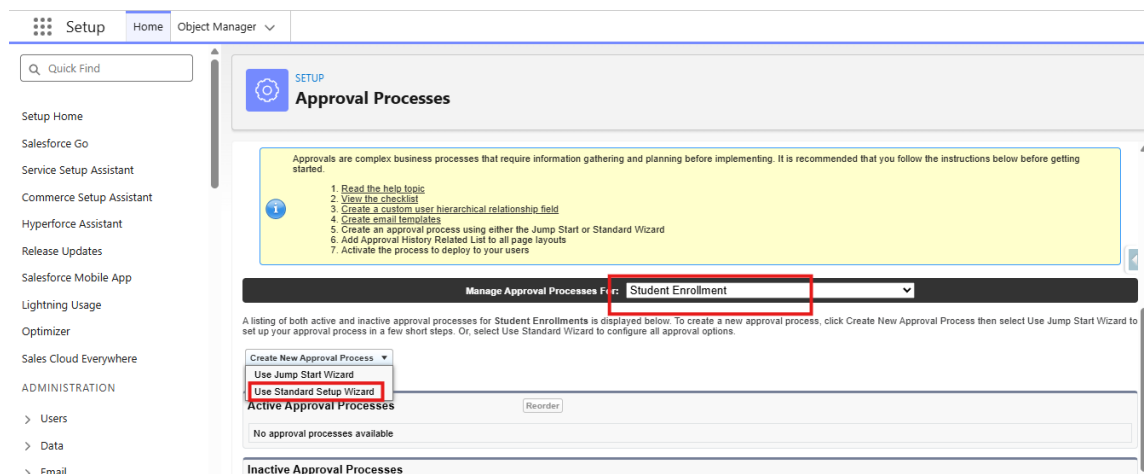

Activity 1: Create an Approval Process for High-Discount Student Enrollment

1. Go to Setup.
2. Search for Approval Processes.
3. Select the Student Enrolment object.
4. Click Create New Approval Process.
5. Choose Standard Setup Wizard.
6. Enter the Approval Process details.
7. Click Save.

Activity 2: Create the Approval Process

1. In the Quick Find box, type: Approval Processes
2. Click on "Approval Processes" under Process Automation
3. Click on the object name: Student Enrolment
4. Click Create New Approval Process → Use Standard Setup Wizard

Step 1: Basic Settings

- Name: High-Discount Student Enrollment Approval
- Unique Name: Auto-fills (you can keep it as is)
- Click Next

The screenshot shows the 'Approval Processes' setup interface. On the left is a navigation menu with options like 'Data', 'Feature Settings', and 'Process Automation'. The main area is titled 'Approval Processes' and 'Student Enrollments'. It is 'Step 1 of 6' and prompts the user to 'Enter a name and description for your new approval process.' There are three input fields: 'Process Name' (containing 'High-Discount Student Enrollment Approval'), 'Unique Name' (auto-filled with 'High-Discount-Student-Enrollment-Approva'), and 'Description' (empty). A 'Next' button is at the bottom right.

Step2: Specify Entry Criteria:

- 1.This defines when the process will be triggered.
- 2.Choose "Criteria are met"
- 3.Set:

- **Field:** Student Enrollment→ Discount Percentage
- **Operator:** Greater than
- **Value:** 30
- **Field:** Student Enrollment→ Enrollment Status
- **Operator:** Equals
- **Value:** Submitted for Approval

- 4.Click Next

The screenshot shows 'Step 2 of 6' of the 'Approval Processes' setup. It asks the user to 'Specify Entry Criteria' and provides a table to define these criteria. The criteria are set to 'criteria are met'.

Field	Operator	Value	
Student Enrollment: Discount Percentage	greater than	30	AND
Student Enrollment: Enrollment Status	equals	Submitted for Approval	AND
--None--	--None--		AND
--None--	--None--		AND
--None--	--None--		

Buttons for 'Previous', 'Next', and 'Cancel' are at the bottom right.

Step 3: Select Approver

1. Approver Selection

- Choose Automatically assign to approver(s)
- Select Manager of Record Owner

2. Record Editability

- Select Administrators ONLY can edit records during the approval process
- Click Next

The screenshot shows the 'Approval Processes' setup page in a web application. The left sidebar contains navigation links: Setup, Home, and Object Manager. Below these is a search bar and a list of categories: Data, Feature Settings, and Process Automation. The 'Approval Processes' link is highlighted. The main content area is titled 'Approval Processes' and shows 'New Approval Process' for 'Student Enrollments'. The current step is 'Step 3. Specify Approver Field and Record Editability Properties'. The page includes a 'Previous' button, a 'Next' button, and a 'Cancel' button. The 'Select Field Used for Automated Approval Routing' section has a dropdown menu set to 'Manager' and a checkbox for 'Use Approver Field of Course Owner'. The 'Record Editability Properties' section has two radio buttons: 'Administrators ONLY can edit records during the approval process.' (selected) and 'Administrators OR the currently assigned approver can edit records during the approval process.'.

Step 4: Email Template Selection

Approval Assignment Email Template

1. Select High-Discount Enrollment Approval Notification
2. Click Next

The screenshot shows the 'Approval Processes' setup page in a web application. The left sidebar contains navigation links: Setup, Home, and Object Manager. Below these is a search bar and a list of categories: Data, Feature Settings, and Process Automation. The 'Approval Processes' link is highlighted. The main content area is titled 'Approval Processes' and shows 'New Approval Process' for 'Student Enrollments'. The current step is 'Step 4. Select Notification Templates'. The page includes a 'Previous' button, a 'Next' button, and a 'Cancel' button. The 'Email Template' section has a dropdown menu set to 'High-Discount Enrollment Ap'.

Step 5: Select Fields to Display on Approval Page Layout

You will see:

- Available Fields (left)
- Selected Fields (right)

Suggested Fields to Display

- Student Name
- Course Name
- Discount Percentage
- Final Payable Amount
- Enrollment Status

Use:

- Add (→) button to move fields
- Up / Down arrows to arrange display order
- Click Next

The screenshot shows the 'Approval Processes' setup page in Salesforce. At the top, there's a 'SETUP' button and the title 'Approval Processes'. Below this, there are two main columns. The left column, titled 'Available Fields', contains 'Created By' and 'Last Modified By'. The right column, titled 'Selected Fields', contains 'Student Enrollment ID', 'Student', 'Course Name', 'Discount Percentage', 'Final Payable Amount', and 'Enrollment Status'. The 'Enrollment Status' field is highlighted in blue. Between the columns are 'Add' and 'Remove' buttons. To the right of the 'Selected Fields' column are 'Up' and 'Down' arrows. Below the columns, there's a section titled 'Approval Page Fields' with a checkbox 'Display approval history information in addition to the fields selected above.' and a 'Security Settings' section with two radio buttons: 'Allow approvers to access the approval page only from within the Salesforce application. (Recommended)' and 'Allow approvers to access the approval page from within the Salesforce application, or externally from a wireless-enabled mobile device.' A link 'Click here to view an example' is also present.

Step 6: Specify Initial Submitters

This defines who can submit records for approval.

Steps

- Search for Owner
- Add Record Owner to Selected Submitters

This allows **counselors** (record owners) to submit enrollments.

- Click **Save**

Approval Processes

Initial Submitters

Submitter Type Search: **Owner** for: Find

Available Submitters

--None--

Allowed Submitters

Course Owner

Add

Remove

Page Layout Settings

☒ Add the Submit for Approval button and Approval History related list to all Student Enrollment page layouts

Step 7: Final Approval Actions

Open the Approval Process which we have created just now
This defines what happens after approval.

Create Field Update

- Click Add New → Field Update

Approval Processes

Approval Steps

You have not yet defined any approval steps

Field Updates

Identification

Name: Set Enrollment Approval Stat

Unique Name: Set_Enrollment_Approval_St

Description:

Object: Student Enrollment

Field to Update: Enrollment Status

Field Data Type: Picklist

Re-evaluate Workflow Rules after Field Change: ☐

Specify New Field Value

Picklist Options

☐ The value above the current one

☐ The value below the current one

☒ A specific value: Approved

Save Save & New Cancel

Step 8: Final Rejection Actions

This defines what happens if the approval is rejected.

Create Field Update

Click Add New → Field Update

Field	Value
Name	Set Enrollment Status to Rejected
Field to Update	Enrollment_Status__c
New Value	Rejected
Action	Click Save

The screenshot shows the 'Field Updates' setup page in Salesforce. The 'Identification' section includes fields for Name ('Set Enrollment Status to Rej'), Unique Name ('Set_Enrollment_Status_to_Rej'), Description, Object ('Student Enrollment'), Field to Update ('Enrollment Status'), Field Data Type ('Picklist'), and a checkbox for 'Re-evaluate Workflow Rules after Field Change'. The 'Specify New Field Value' section shows 'Picklist Options' with three radio buttons: 'The value above the current one', 'The value below the current one', and 'A specific value' (selected). The 'A specific value' dropdown is set to 'Rejected'. At the bottom are 'Save', 'Save & New', and 'Cancel' buttons.

Step 9: Create an Approval Step

1. Under Approval Steps, Click on New Approval Step
2. Give the Name as Step1
3. Give the Unique Name as Step1
4. Step Number = 1
5. Click on Next

The screenshot shows the 'Approval Processes' setup page in Salesforce. The 'New Approval Step' section is active, showing 'Step 1 of 3'. The 'Enter Name and Description' section includes fields for Approval Process Name ('High-Discount Student Enrollment Approva'), Name ('Step1'), Unique Name ('Step1'), Description, and Step Number ('1'). At the bottom are 'Next' and 'Cancel' buttons.

**** Select All Records Should enter this Step**

Step 10: Activate the Approval Process Click View Approval Process Detail Page
Click Activate (top-right)

Milestone 7 : Email Templates

Activity 1: Create a High Priority Student Application Notification Email Template Purpose immediate attention.

1. Go to Setup (gear icon on top-right).
2. In the Quick Find box, type Email Templates.
3. Click on Classic Email Templates.
4. Click New Template. Choose the type: Text – Plain text (no formatting) Click Next
Template Name: High Priority Student Application Notification Subject: High-Priority Student Application Assigned to You Body: Hello {!Student__Enrollment__c.OwnerFullName},

A student application has been identified as high priority by AI and requires immediate attention.

Student Application Details:

1. Student Name: {!Student__Enrollment__c.Student__r.Name}
2. Course Applied: {!Student__Enrollment__c.Course__r.Name}
3. AI Priority Score: {!Student__Enrollment__c.AI_Priority_Score__c}
4. Enrollment Date: {!Student__Enrollment__c.Enrollment_Date__c}

Please contact the student and proceed with the admission process within 24 hours.
thank you, AI-Enabled Student Admissions System Click on save.

Activity 2: Create a High Discount Student Enrollment Approval Email Template

1. Go to Setup (gear icon on top-right).
2. In the Quick Find box, type Email Templates.
3. Click on Classic Email Templates.
4. Click New Template. Choose the type: Text – Plain text (no formatting) Click Next
Template Name: High Discount Student Enrollment Approval Notification Subject: Student Enrollment Awaiting Discount Approval Body: Hello {!Student_Enrollment__c.OwnerFullName},

A student enrollment with a high discount has been submitted for your approval.

Enrollment Details:

Student Name: {!Student_Enrollment__c.Student__r.Name}

Course Name: {!Student_Enrollment__c.Course__r.Name}

Course Fee: {!Student_Enrollment__c.Course__r.Course_Fee__c}

Discount Percentage: {!Student_Enrollment__c.Discount__c}%

Final Payable Amount: {!Student_Enrollment__c.Final_Payable_Amount__c}

Please review the enrollment details and approve or reject the request accordingly.

Thank you, Student Admissions Approval System Click on save

Activity 3: Create a Student Enrollment Approval Outcome Notification Email Template

1. Go to Setup (gear icon on top-right).
2. In the Quick Find box, type Email Templates.
3. Click on Classic Email Templates.
4. Click New Template. Choose the type: Text – Plain text (no formatting) Click Next
Template Name: Student Enrollment Approval Status Notification Subject: Student Enrollment Approval Decision Body: Hello {!Student_Enrollment__c.OwnerFullName},
5. The approval process for a student enrollment has been completed.

Enrollment Summary:

1. Student Name: {!Student_Enrollment__c.Student__r.Name}

2. Course Name: {!Student_Enrollment__c.Course__r.Name}

3. Approval Status: {!Student_Enrollment__c.Approval_Status__c}

4. Final Payable Amount: {!Student_Enrollment__c.Final_Payable_Amount__c}

Please proceed with the next steps in the admission process based on the approval outcome.

Thank you, Student Admissions Management System Click on save.

Milestone 8 - Email Alerts

Activity 1: Create High Priority Lead Email Alert

Steps:

1. In the quick find box, search for email alerts.
2. Click on email alerts
3. Click on Continue
4. Click on New Email Alert
5. Give the Description as High Priority Student Application Email Alert
6. Unique Name will be auto populated
7. Select the object as Student Enrollment
8. Select the High Priority Student Application Notification Email Template
9. For Recipient Type User and Select Student Enrollment Owner
10. Click on Save.

Activity 2: Create High Discount Student Enrollment Approval Email Alert

Steps:

1. In the quick find box, search for email alerts.
2. Click on email alerts
3. Click on Continue
4. Click on New Email Template
5. Give the Description as High Discount Enrollment Approval Email Alert
6. Unique Name will be auto populated
7. Select the object as Student Enrollment
8. Select the High Discount Student Enrollment Approval Notification
9. For Recipient Type User and Select Manager
10. Click on Save.

Activity3: Create Student Enrollment Approval Status Email Alert

1. Click on Email Alerts.
2. Click on Continue.
3. Click on New Email Alert.
4. Email Alert Details:
5. Description: Student Enrollment Approval Status Email Alert
6. Unique Name: Auto populated

7. Object: Student_Enrollment__c
8. Email Template: Student Enrollment Approval Status Notification
9. Recipient Type: User
10. Recipient: Enrollment Owner (Counselor)
11. Click on Save.

Milestone 9 - Declarative Automation (Flows)

Activity 1: Record-Triggered Flow – High Priority Student Application

Notification

Objective: Automatically notify the Enrollment Owner (Counselor) when a student application is identified as high priority by AI. Trigger Condition: AI_Priority_Score__c $\geq$ 80 Steps: From Setup, in the Quick Find box, search for Flows.

1. Click New Flow.
2. Select Category: Triggered.
3. Select Type: Record-Triggered Flow.
4. Select Object: Student_Enrollment__c.
5. Configure Trigger: When a record is created or updated.
6. Set Entry Conditions:
7. Field: AI_Priority_Score__c
8. Operator: Greater than or Equal
9. Value: 80
10. Select Run Every time a record is created and meets the condition requirements.
11. Optimize the flow for Actions and Related Records.
12. Click on the + icon and add Send Email Alert action.
13. Select Email Alert: High Priority Student Application Email Alert.
14. Enter the Label as: High Priority Student Application Notification.
15. Map RecordId to the Record Id field.
16. Save the Flow and Activate.

Activity 2: Record-Triggered Flow – High Discount Enrollment Submission for Approval

Objective: Automatically submit a student enrollment for approval when a high discount is applied. Trigger Condition: Discount__c $>$ 30

Steps: From Setup, in the Quick Find box, search for Flows.

1. Click New Flow.
2. Select Category: Triggered.
3. Select Type: Record-Triggered Flow.

4. Select Object: Student_Enrollment__c.
5. Configure Trigger: When a record is created or updated.
6. Set Entry Conditions:
7. Field: Discount__c
8. Operator: Greater than
9. Value: 30
10. Select Run Every time a record is created and meets the condition requirements.
11. Optimize the flow for Actions and Related Records.
12. Click on the + icon and add Submit for Approval action.
13. Select Approval Process: High Discount Student Enrollment Approval.
14. Enter the Label as: Submit Enrollment for Approval.
15. Map RecordId to the Record Id field.
16. Save the Flow and Activate.

Activity 3: Scheduled-Triggered Flow – Pending Enrollment Follow-Up

Objective: Automatically identify student enrollments that are pending approval for more than 2 days and notify the counselor. Schedule Condition: Runs daily.

Steps: From Setup, in the Quick Find box, search for Flows.

1. Click New Flow.
2. Select Category: Triggered.
3. Select Type: Scheduled-Triggered Flow.
4. Set the Start Date and Time (for example: Today, 9:00 AM).
5. Set Frequency: Daily.
6. Select Object: Student_Enrollment__c.
7. Set Condition Requirements:
8. Approval_Status__c Equals Pending
9. Set Additional Condition:
10. LastModifiedDate Less than TODAY() – 2
11. Optimize the flow for Actions and Related Records.
12. Click on the + icon and add Send Email Alert action.
13. Select Email Alert: Student Enrollment Approval Status Email Alert.
14. Enter the Label as: Pending Enrollment Reminder.
15. Map RecordId to the Record Id field.
16. Save the Flow and Activate.

Activity 4: Screen Flow – Student Enrollment Creation Wizard

Objective: Provide a guided, user-friendly screen-based process for counselors to create student enrollments.

Steps: From Setup, in the Quick Find box, search for Flows.

1. Click New Flow.
2. Select Category: Screen Flow.

3. Click Create.
4. Add a Screen element:
5. Screen Name: Student Details
6. Fields: Student, Course, Enrollment Date
7. Add another Screen element:
8. Screen Name: Fee & Discount
9. Fields: Course Fee (Display), Discount
10. Add a Formula / Assignment:
11. Calculate Final Payable Amount
12. Add a Create Records element:
13. Create Student_Enrollment__c record
14. Add a Confirmation Screen:
15. Display Enrollment Created Successfully
16. Save the Flow with name: Student Enrollment Screen Flow.
17. Activate the Flow.

Milestone 10: Agentforce AI

Activity 1: Enable Agentforce & AI Trust Settings

Objective: Enable Agentforce features securely and control AI access.

Steps:

1. Go to Setup.
2. In the Quick Find box, search for Agentforce.
3. Click on Agentforce Setup.
4. Click Enable Agentforce.
5. Go to AI Trust & Permissions.
6. Enable:
 7. Data Masking
 8. Zero Data Retention
 9. Audit Logging
10. Assign Agentforce access to System Administrator and Admissions Manager profiles.
11. Click Save.

Activity 2: Create Prompt Template – Student Application Summary

Objective: Generate an AI-based summary of a student enrollment for counselors and managers.

Steps: From Setup, search for Prompt Builder.

1. Click Prompt Builder.
2. Click New Prompt Template.
3. Select Prompt Type: Summary
4. Select Object: Student_Enrollment__c
5. Enter Prompt Name: Student Application Summary Prompt

6. Prompt Content:
7. Summarize the student application in simple terms including:
 - Student name
 - Course applied
 - Course fee and discount
 - Final payable amount
 - Enrollment status
 - AI priority score
- 8.Highlight any risks or special considerations.
- 9.Click Save and Activate.

Activity 3: Create Prompt Template – Admission Risk Analysis

Objective: Help managers understand whether a student enrollment is risky or high value.

Steps: Go to Prompt Builder.

1. Go to Prompt Builder.
2. Click New Prompt Template.
3. Select Prompt Type: Flex
4. Select Object: Student_Enrollment__c
5. Prompt Name: Student Enrollment Risk Analysis Prompt
6. Prompt Content: ; Analyze this student enrollment and determine:
 - Probability of successful admission
 - Financial risk based on discount
 - Overall enrollment health (Low, Medium, High Risk)
7. Provide recommendations for approval or rejection.
8. Click Save and Activate.

Activity 4: Create Admissions AI Agent

Objective: Create an AI agent to assist counsellors and managers during admissions.

Steps:

1. From Setup, search for Agents.
2. Click Agents.
3. Click New Agent.
4. Agent Name: Admissions Assistant Agent
5. Description: AI agent to assist with student admissions and approvals.
6. Assign Topics:
 - Student Application Summary
 - Enrollment Risk Analysis
 - Discount Approval Guidance
- 7.Click Next.

Activity 5: Configure Agent Actions

Objective: Allow the agent to take intelligent actions.

Steps:

1. Inside the Agent configuration, go to Actions.
2. Add Actions:
 - Generate Student Application Summary
 - Analyze Enrollment Risk
 - Recommend Approval Decision
3. Map each action to the corresponding Prompt Template.
4. Click Save.

Activity 6: Configure Agent Data Library

objective: Allow Agentforce to answer questions using Salesforce data. Steps: In Agent setup, click Data Library.

1. Add Objects:
 - Student__c
 - Course__c
 - Student_Enrollment__c
2. Set Access Level: Read Only.
3. Enable field-level access controls.
4. Click Save.

Activity 7: Test the Agent

Objective: Validate agent responses using real project data.

Steps:

1. Open a Student Enrollment record.
2. Launch the Admissions Assistant Agent.
3. Ask:
 - “Summarize this student application.”
 - “Is this enrollment safe to approve?”
 - “What risks are involved in this discount?”
4. Verify the agent’s response accuracy.

Activity 8: Deploy Agentforce

Objective: Make the agent available to users.

Steps:

1. Go to Agent Deployment.
2. Choose Deployment Type:
3. Assign to:
4. Click Deploy.

Milestone 11 – The Lightning App

Activity 1: Create a Lightning App for “AI-Enabled Student Admission System

1. Click New Lightning App.
2. Enter AI-Enabled Student Admissions & Support Management System as the App Name >> Click on upload image and add an image related to AI-Enabled Student Admissions & Support Management System then click next
3. Under App Options, leave the default selections and click next.
4. Under Utility Items, leave as is and click Next.
5. From Available Items, select
Account
Contact
Student_Enrollment__c
Course__c
Opportunity
and move them to the Selected Item and Click Next.
6. From Available Profiles, select System Administrator and move it to Selected Profiles.
7. Click Save & Finish.

Milestone 12 - Editing of Page Layouts

Activity 1: To edit a Page Layout in Student_Enrollment__c Object

1. Go to setup >> click on Object Manager >> type object name (Student_Enrollment__c) in quick find box >> click on the Student Enrollment object >> Page Layouts.
2. Click on the Student Enrollment Layout.
3. Drag and arrange the field as shown below.
4. Click on Save.

Activity 2: To edit a Page Layout in Course__c Object

1. Go to setup >> click on Object Manager >> type object name (Course) in quick find box >> click on the Course object >> Page Layouts.
2. Click on the Course Layout
3. Drag and arrange the field as shown below
4. Click Save.

Activity 3: To edit a Page Layout in Account Object

1. Go to setup >> click on Object Manager >> type object name (Account) in quick find box >> click on the Account object >> Page Layouts.
2. Click on the Account Layout
3. Drag and arrange the field as shown below
4. Click Save.

Activity 4: To edit a Page Layout in Opportunity Object

1. Go to setup >> click on Object Manager >> type object name (Opportunity) in quick find box >> click on the Opportunity object >> Page Layouts.
2. Click on the Opportunity Layout
3. Drag and arrange the field as shown below
4. Click Save

Activity 5: To edit a Page Layout in Contact Object

1. Go to setup >> click on Object Manager >> type object name (Contact) in quick find box >> click on the Contact object >> Page Layouts.
2. Click on the Contact Layout
3. Drag and arrange the field as shown below
4. Click Save

Milestone 13 - Dynamic Forms

Activity 1: To create a Dynamic Form in AI Recommendation Object

1. Go to setup >> click on App Launcher >> Open “AI-Enabled Student Admissions & Support Management System” App >> click on the Student Enrollment object tab>> Click on New and create a new record and save it .
2. Click on the record created and click on the Gear icon on the top right corner and Select Edit Page.
3. Click on the Details section and on the right pane click on Upgrade Now to enable Dynamic Forms for the object.
4. Select Student Enrollment PageLayout and Click on Finish.
5. Click on Save and Click on Activate.
6. Click on Org as Default, select Desktop and Phone, click Next and Click Save.
7. Do the same for remaining objects as well.

Milestone 14 - Dynamic Forms

Activity 1: Create Admission Counselor User Note: Before Implementing Users first complete Profiles and Roles Milestones.

1. Go to Setup → type Users in the Quick Find box → select Users → click New User.
2. Fill in the following fields:
3. First Name : Admission
4. Last Name : Counselor
5. Alias : Give an Alias Name (ex: acoun)
6. Email Id : Give your personal Email Id
7. Username : Username should be in the format text@text.text and must be unique
8. Nick Name : Give a Nickname
9. Role : Admission Counselor
10. User License : Salesforce
11. Profile : Admission Counselor Profile
12. Click Save.

Activity 2: creating other users

1. Repeat the steps and create other users using
 - Role : Admission Manager
 - User license : Salesforce
 - Profile : Admission Manager Profile

Milestone 15 – Duplicate and Matching Rules

Activity 1: Create a Custom Matching Rule for Student (Contact)

Objective: Ensure that each Student (Contact) is uniquely identified using Email and Phone Number.

Steps:

1. Go to Setup.
2. In the Quick Find box, search for Matching Rules.
3. Click New Rule.
4. Select Object: Contact and click Next.
5. Enter Rule Name: Unique Student – Email & Phone.
6. In Matching Criteria:
 - Field: Email → Matching Method: Exact
 - Field: Phone → Matching Method: Exact
7. Check Match Blank Fields.
8. Click Next.
9. Click Save & Activate.

Activity 2: Create a Duplicate Rule for Student (Contact)

Steps:

1. Go to Setup.
2. Search for Duplicate Rules.
3. Click New Rule.
4. Select Object: Contact.
5. Enter Rule Name: Unique Student Email and Phone.
6. Set Action on Create and Action on Edit: Allow and Report.
In Alert Text:
Student Email and Phone Number must be unique.
7. In the Matching Rules section:
8. Click Add Rule.
9. Select the previously created Matching Rule
(Unique Student – Email & Phone).
10. Click Save & Activate.

Activity 3: Create a Custom Matching Rule for Student Enrollment

Objective: Prevent duplicate Student Enrollment records for the same student and same course.

Steps:

1. Go to Setup.
2. In the Quick Find box, search for Matching Rules.
3. Click New Rule.
4. Select Object: Student_Enrollment__c and click Next.
5. Enter Rule Name: Unique Enrollment – Student & Course.
6. In Matching Criteria:
 - Field: Student__c (Lookup to Contact) → Matching Method: Exact
 - Field: Course__c → Matching Method: Exact
7. Check Match Blank Fields.
8. Click Next.
9. Click Save & Activate.

Activity 4: Create a Duplicate Rule for Student Enrollment

Steps:

1. Go to Setup.
2. Search for Duplicate Rules.
3. Click New Rule.
4. Select Object: Student_Enrollment__c.
5. Enter Rule Name: Unique Student Course Enrollment.
6. Set Action on Create and Action on Edit: Allow and Report.
7. In Alert Text: This student is already enrolled in the selected course.
8. In the Matching Rules section:

9. Click Add Rule.
10. Select the previously created Matching Rule (Unique Enrollment – Student & Course).
11. Click Save & Activate.

Milestone 16: Profiles

Activity 1: Admission Counselor Profile Creation

Objective:

Provide sales users with controlled access to Leads, Opportunities, AI insights, and activities required for daily sales operations.

To create a new profile:

1. Go to Setup >> type Profiles in Quick Find box >> click Profiles >> clone the desired profile (Standard User) >> enter profile name: Admission Counselor Profile >> Save.
2. While still on the profile page, click Edit.
3. Select the Custom App settings as default for the AI-Enabled Student
4. Admissions & Support Management System Scroll down to **Custom Object Permissions** and give **Read/Create/Edit** access for the following objects:
 - Contact (Student)
 - Student Enrollment__c
 - Course__c
 - Task
5. Grant Read-Only access for:
 - Reports
 - Dashboards
 - Set Session Timeout to 2 hours of inactivity
6. AI & Agentforce Access:
 - Read access to AI-related fields:
 - AI Priority Score
 - Risk Level
 - No approval or override permissions
 - Configure Password Policies as:
 - Passwords expire in 90 days
 - Minimum password length = 8
 - Click Save

Activity 2: Admission Manager Profile Creation

1. Go to setup >> type profiles in quick find box >> click on profiles >> clone the desired profile (Standard User Profile) >> enter profile name (Admission Manager Profile) >> Save.

Milestone 17: Roles & Role Hierarchy

Activity 1: Creation of Admission Manager Role

Creating Admission Manager Role:

1. Go to Quick Find
 - Search for Roles
 - Click on Set Up Roles.
2. Click Expand All and click Add Role under CEO.
3. Enter:
 - Label: Admission Manager
 - Role Name: Auto populated
4. Click Save.

Activity 2: Creation of Admission Counselor Role

Creating another role under Admission Manager role:

1. Go to Quick Find
 - Search for Roles
 - Click on Set Up Roles.
2. Click the + (Add Role) under Admission Manager.
3. Enter:
 - Label: Admission Counselor
 - Role Name: Auto populated
4. Click Save.

CONCLUSION

In conclusion, the development of the **AI-Enabled Student Admission & Support Management System** represents a significant step toward modernizing and streamlining the student admission process using Salesforce. By integrating student, course, and enrollment management into a centralized platform, the system improves operational efficiency, data accuracy, and collaboration among admission staff. The implementation of custom objects, validation rules, approval processes, email notifications, Salesforce Flows, and **Agentforce AI** automates key admission activities, minimizes manual effort, and supports faster, more informed decision-making. Additionally, role-based security ensures that sensitive admission data is accessed only by authorized users. Overall, the application provides a scalable, secure, and intelligent solution that enhances the admission experience for both educational institutions and prospective students.

FUTURE SCOPE

- Develop a mobile application for students and admission staff.
- Enhance AI capabilities with predictive analytics for admission trends and student success.
- Integrate WhatsApp and SMS notifications for real-time admission updates.
- Add an online document upload and verification system.
- Integrate online fee payment and payment tracking.
- Provide advanced analytics and interactive dashboards for admission insights.
- Support multi-campus or multi-institution admission management.
- Integrate biometric or Single Sign-On (SSO) authentication for enhanced security.
- Develop a student self-service portal for application tracking and communication.
- Expand Agentforce AI to provide personalized guidance and chatbot support for prospective students.
